

THE ANATOMY OF MARKET MECHANICS

FROM SINGLE CANDLES TO BIG MONEY BOUNDARIES: AN ENGINEERING APPROACH TO TECHNICAL ANALYSIS

ALWAYS HIT “RESET CHART VIEW” BEFORE ANALYSIS

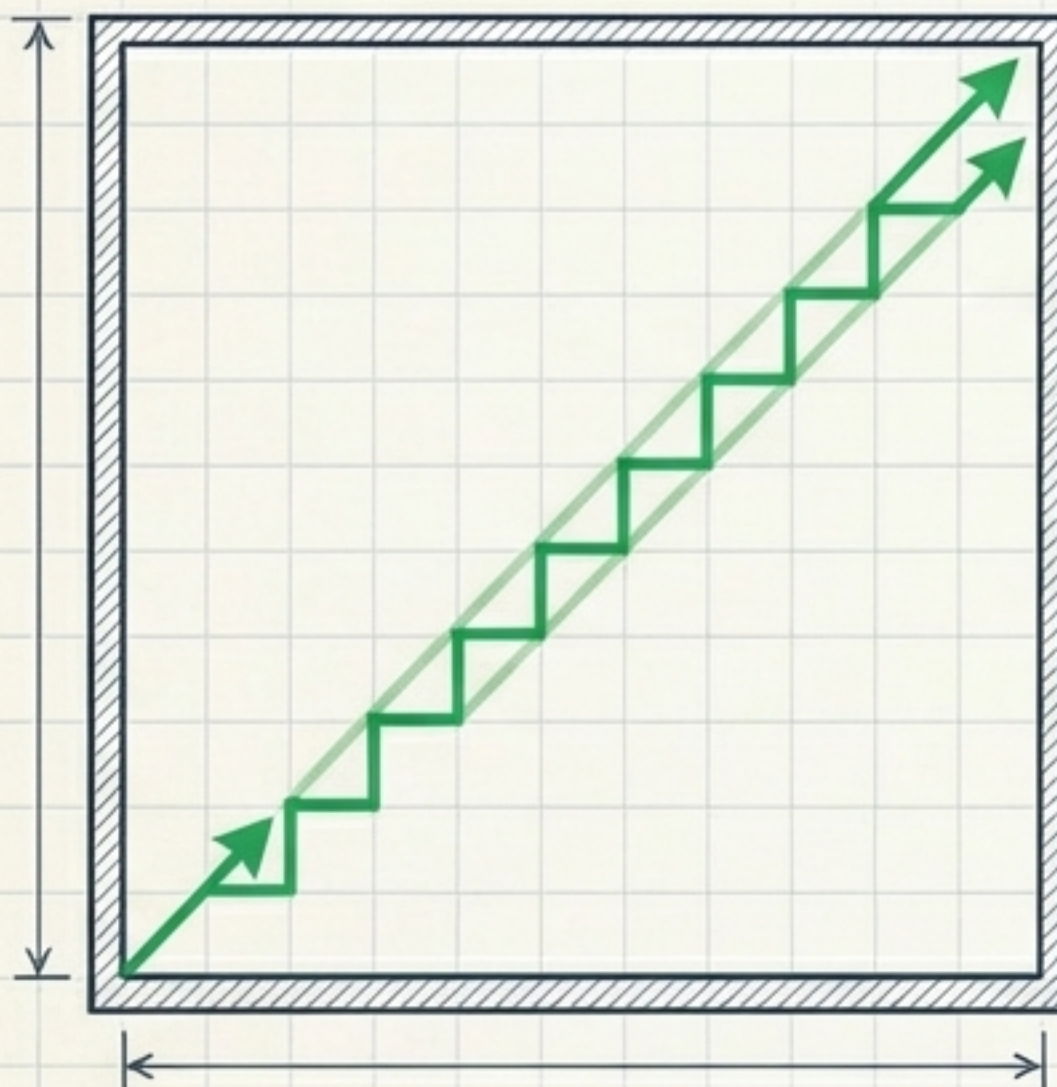

IDENTIFY THE “ULTIMATE HIGH BOUNDARY” AND “ULTIMATE LOW BOUNDARY”.
NEVER ANALYZE THE MESSY MIDDLE. ESTABLISH THE PLAYING FIELD FIRST.

THE THREE ARCHETYPES OF MARKET VELOCITY

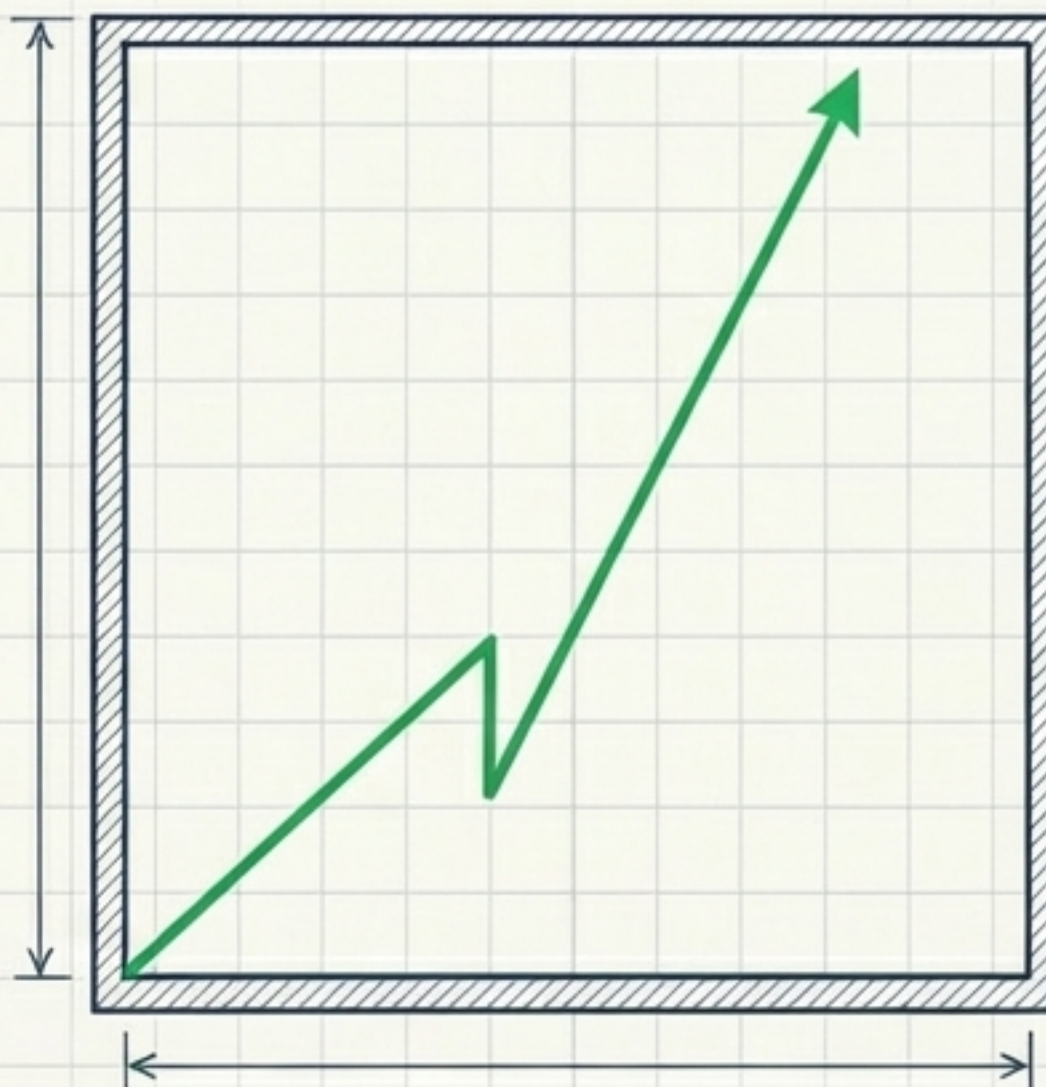

The market only travels between its boundaries in three ways.
Identifying the trajectory dictates the pacing of analysis.

THE ESCALATOR

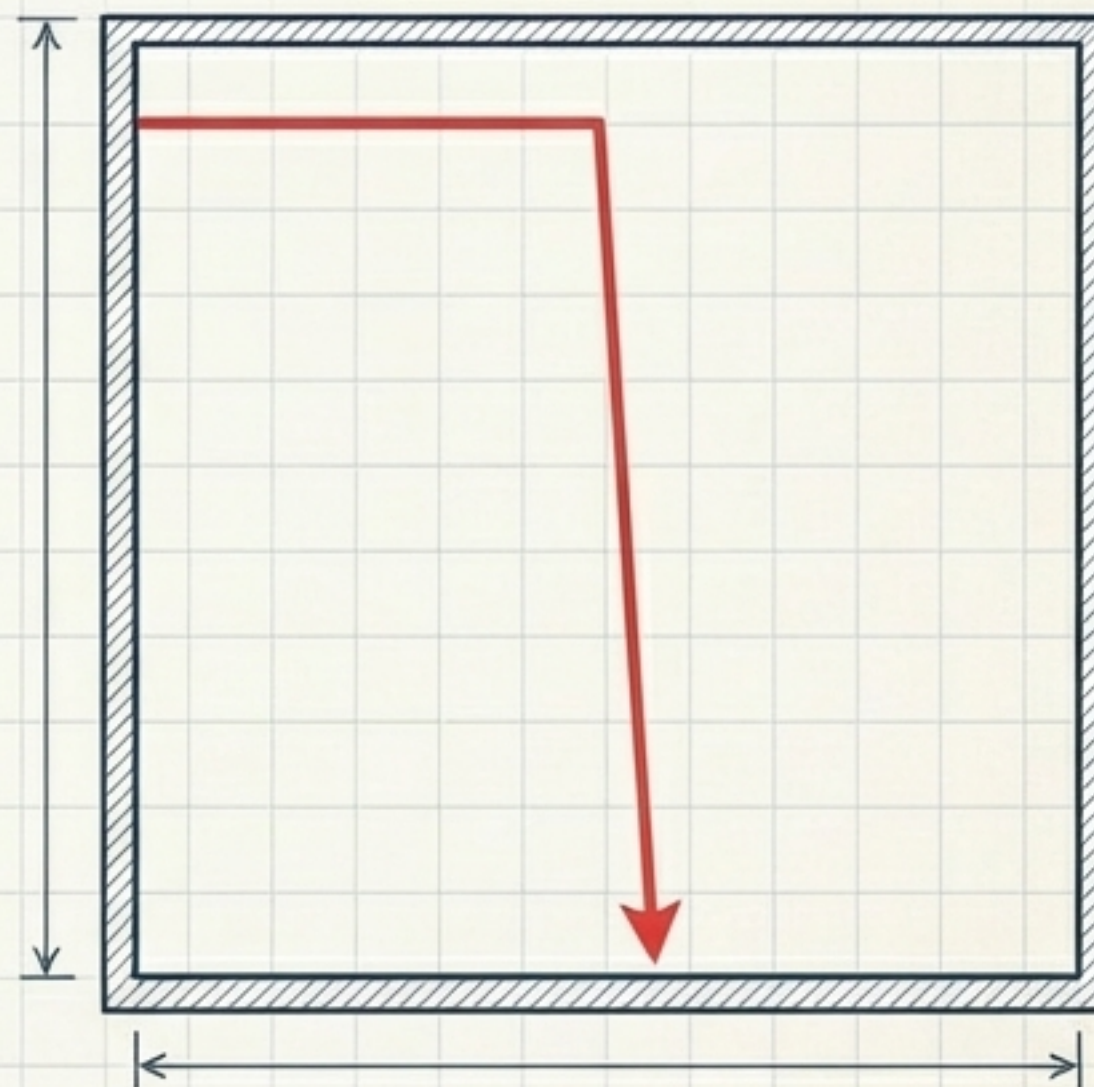

Gradual, structured climb

THE ROCKET

Aggressive, unbroken
upward momentum

THE FREEFALL

"Falling from a building" –
zero resistance collapse

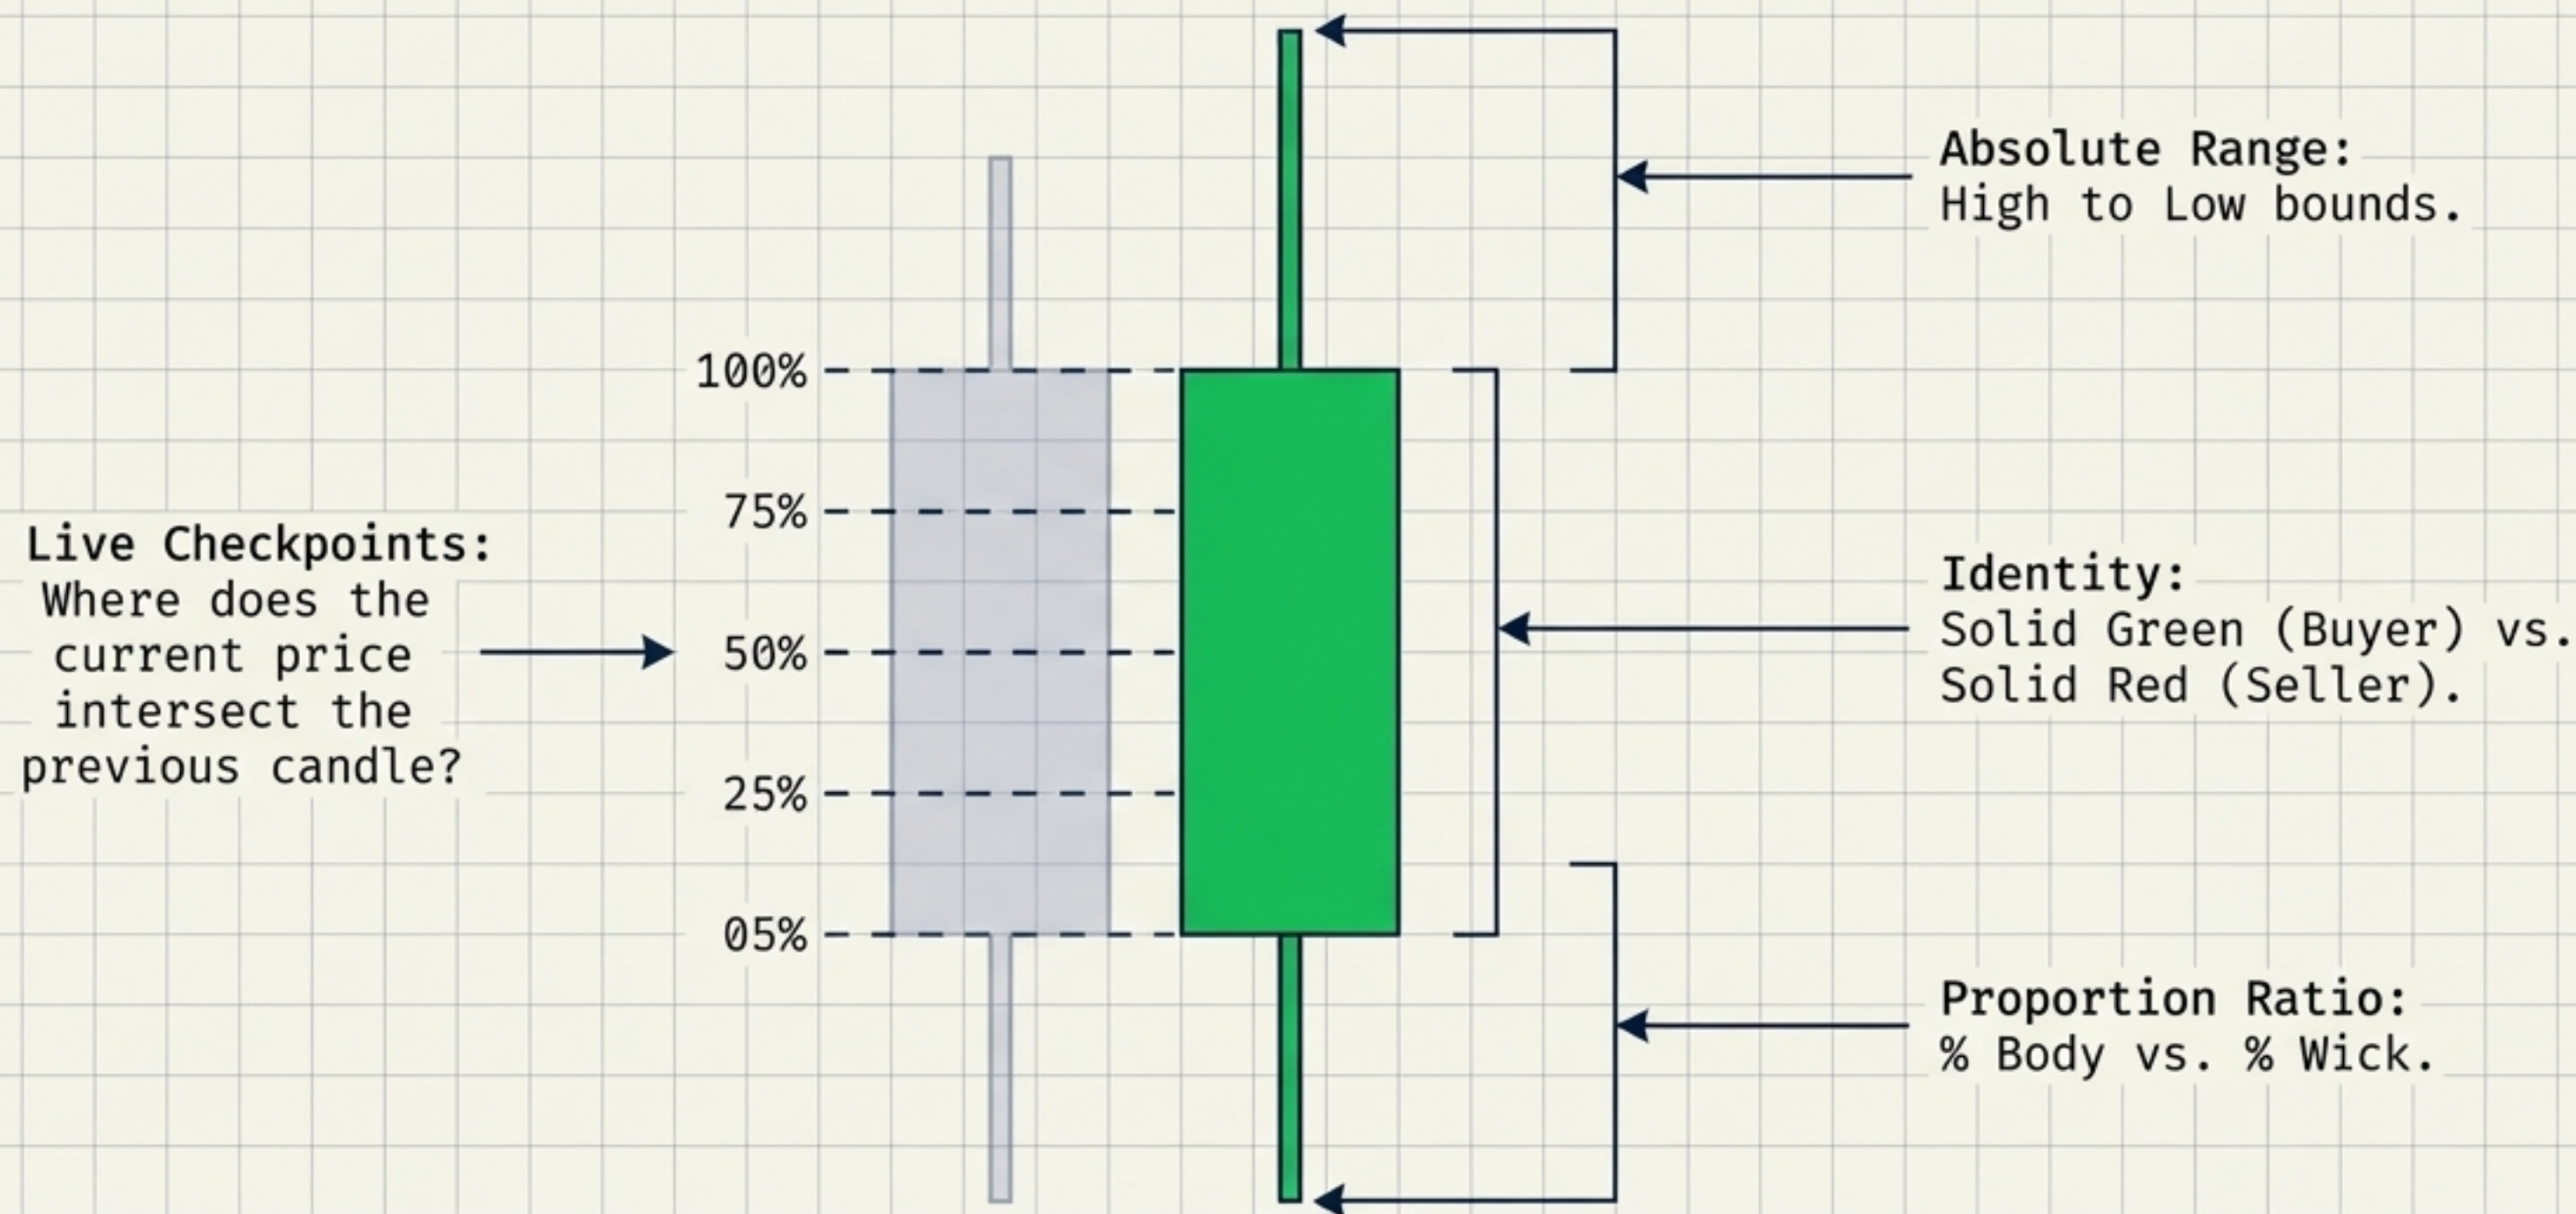

MARKET LIFE BEGINS WITH A SINGLE CELL

Just as life begins with a single cell, the entire market begins with a single candle.

Establish a strict analytical hierarchy: Read the Candle → Read the Pattern → Read the Trend.

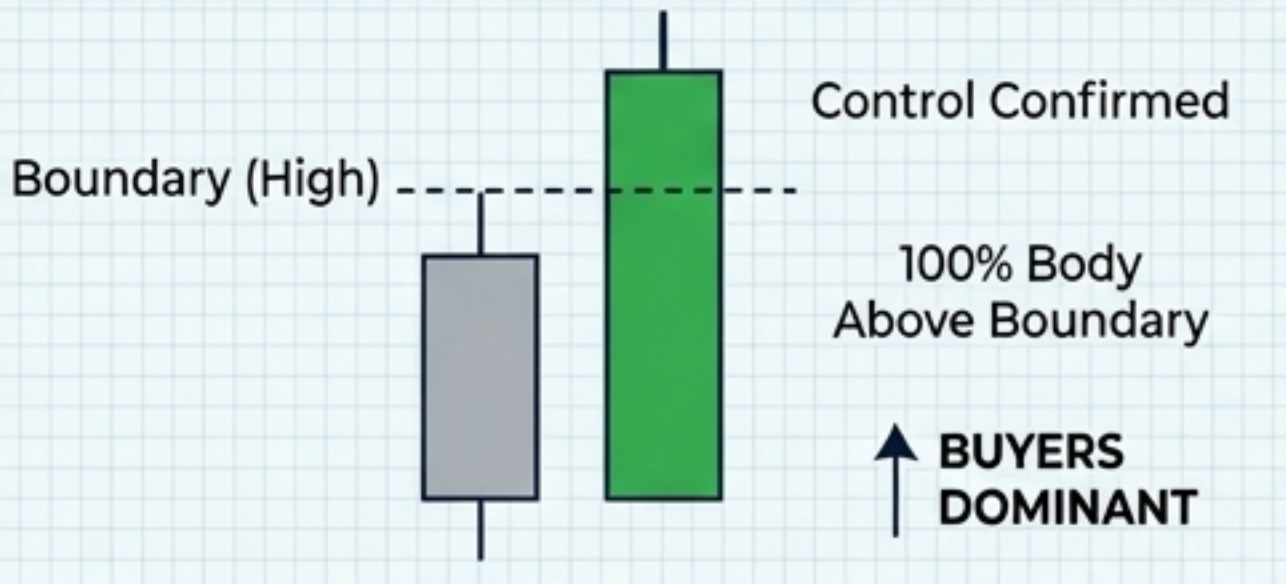

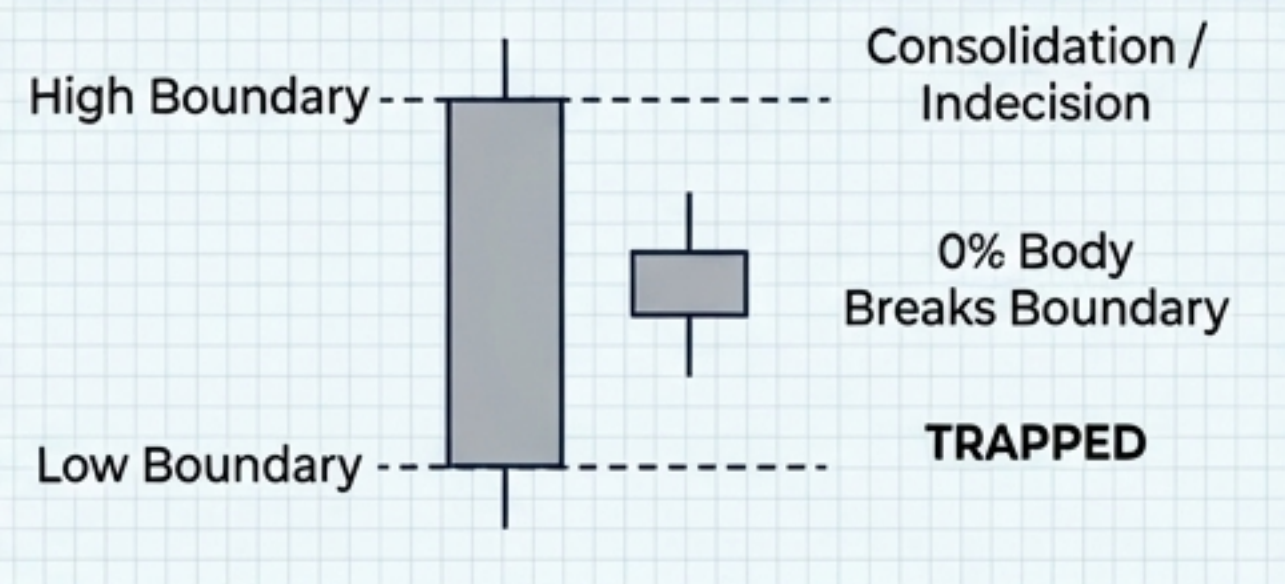

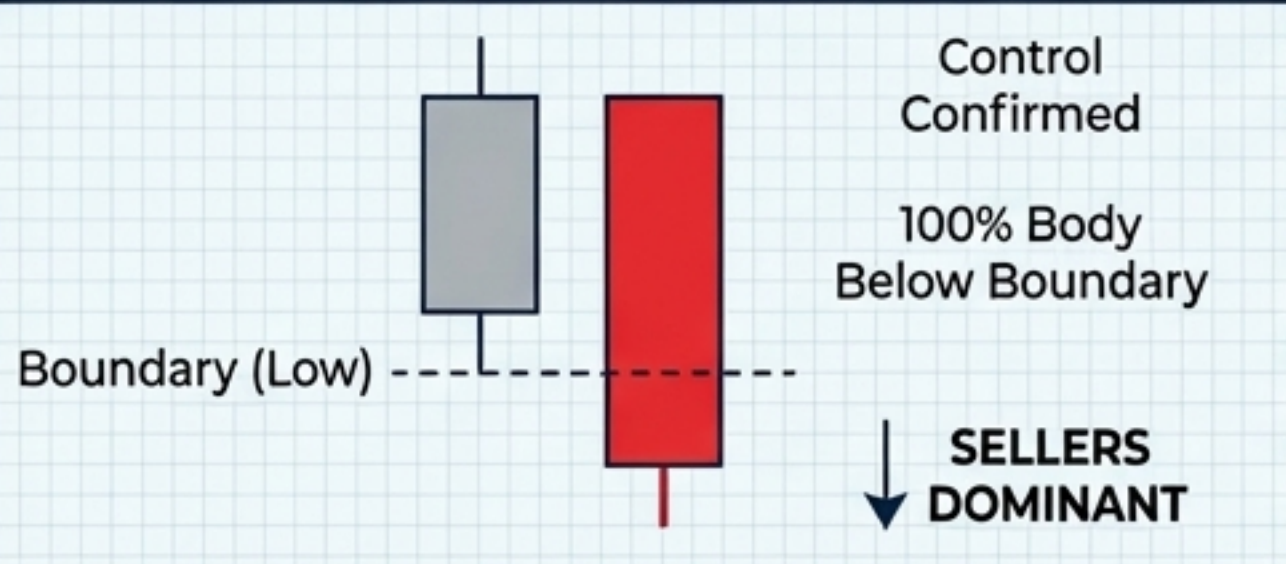

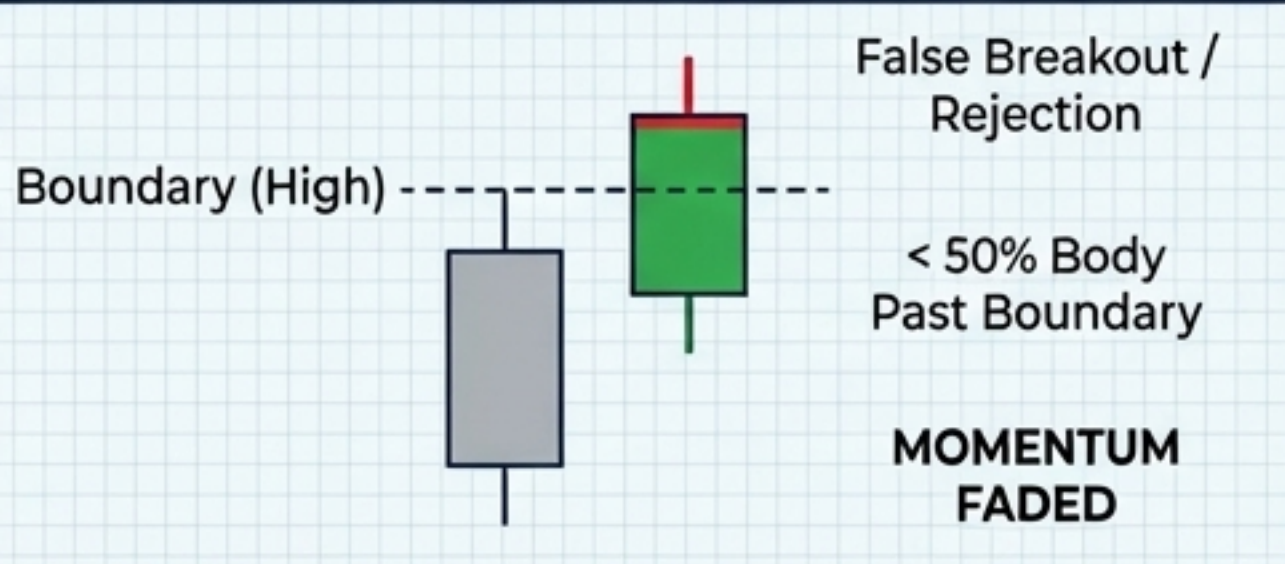

THE ANATOMY OF A LIVE CANDLE

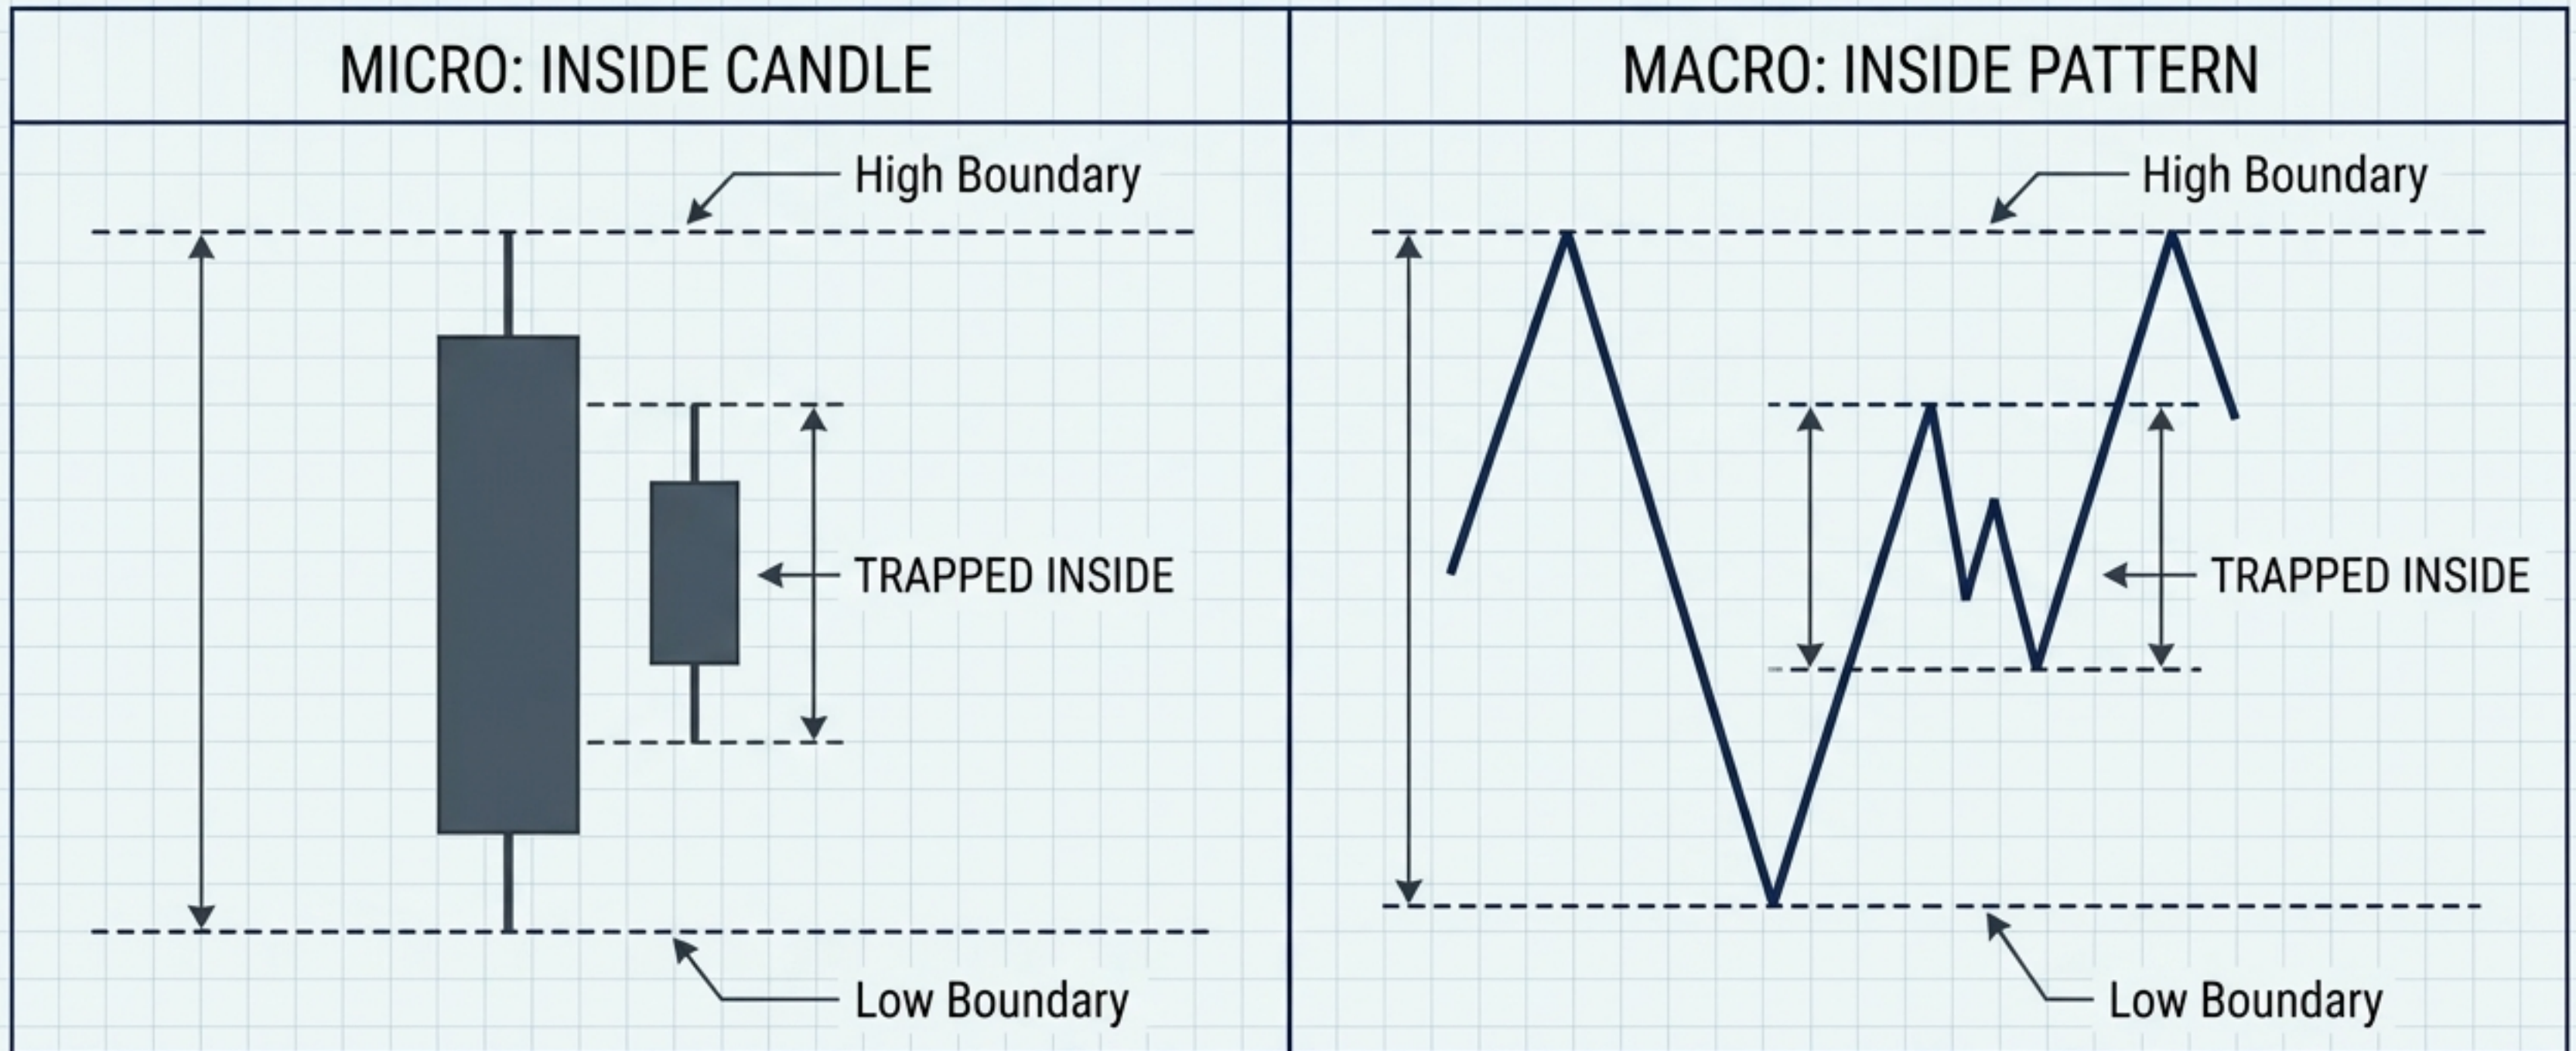

THE CLOSING STATE MATRIX

The exact percentage of the body that crosses the boundary determines true control versus a failed breakout.

OUTSIDE CANDLE (BUYERS)	INSIDE CANDLE
 Boundary (High) --- Control Confirmed 100% Body Above Boundary ↑ BUYERS DOMINANT	 High Boundary --- Consolidation / Indecision 0% Body Breaks Boundary Low Boundary --- TRAPPED
OUTSIDE CANDLE (SELLERS)	FAILED OUTSIDE CANDLE
 Boundary (Low) --- Control Confirmed 100% Body Below Boundary ↓ SELLERS DOMINANT	 Boundary (High) --- False Breakout / Rejection < 50% Body Past Boundary MOMENTUM FADED

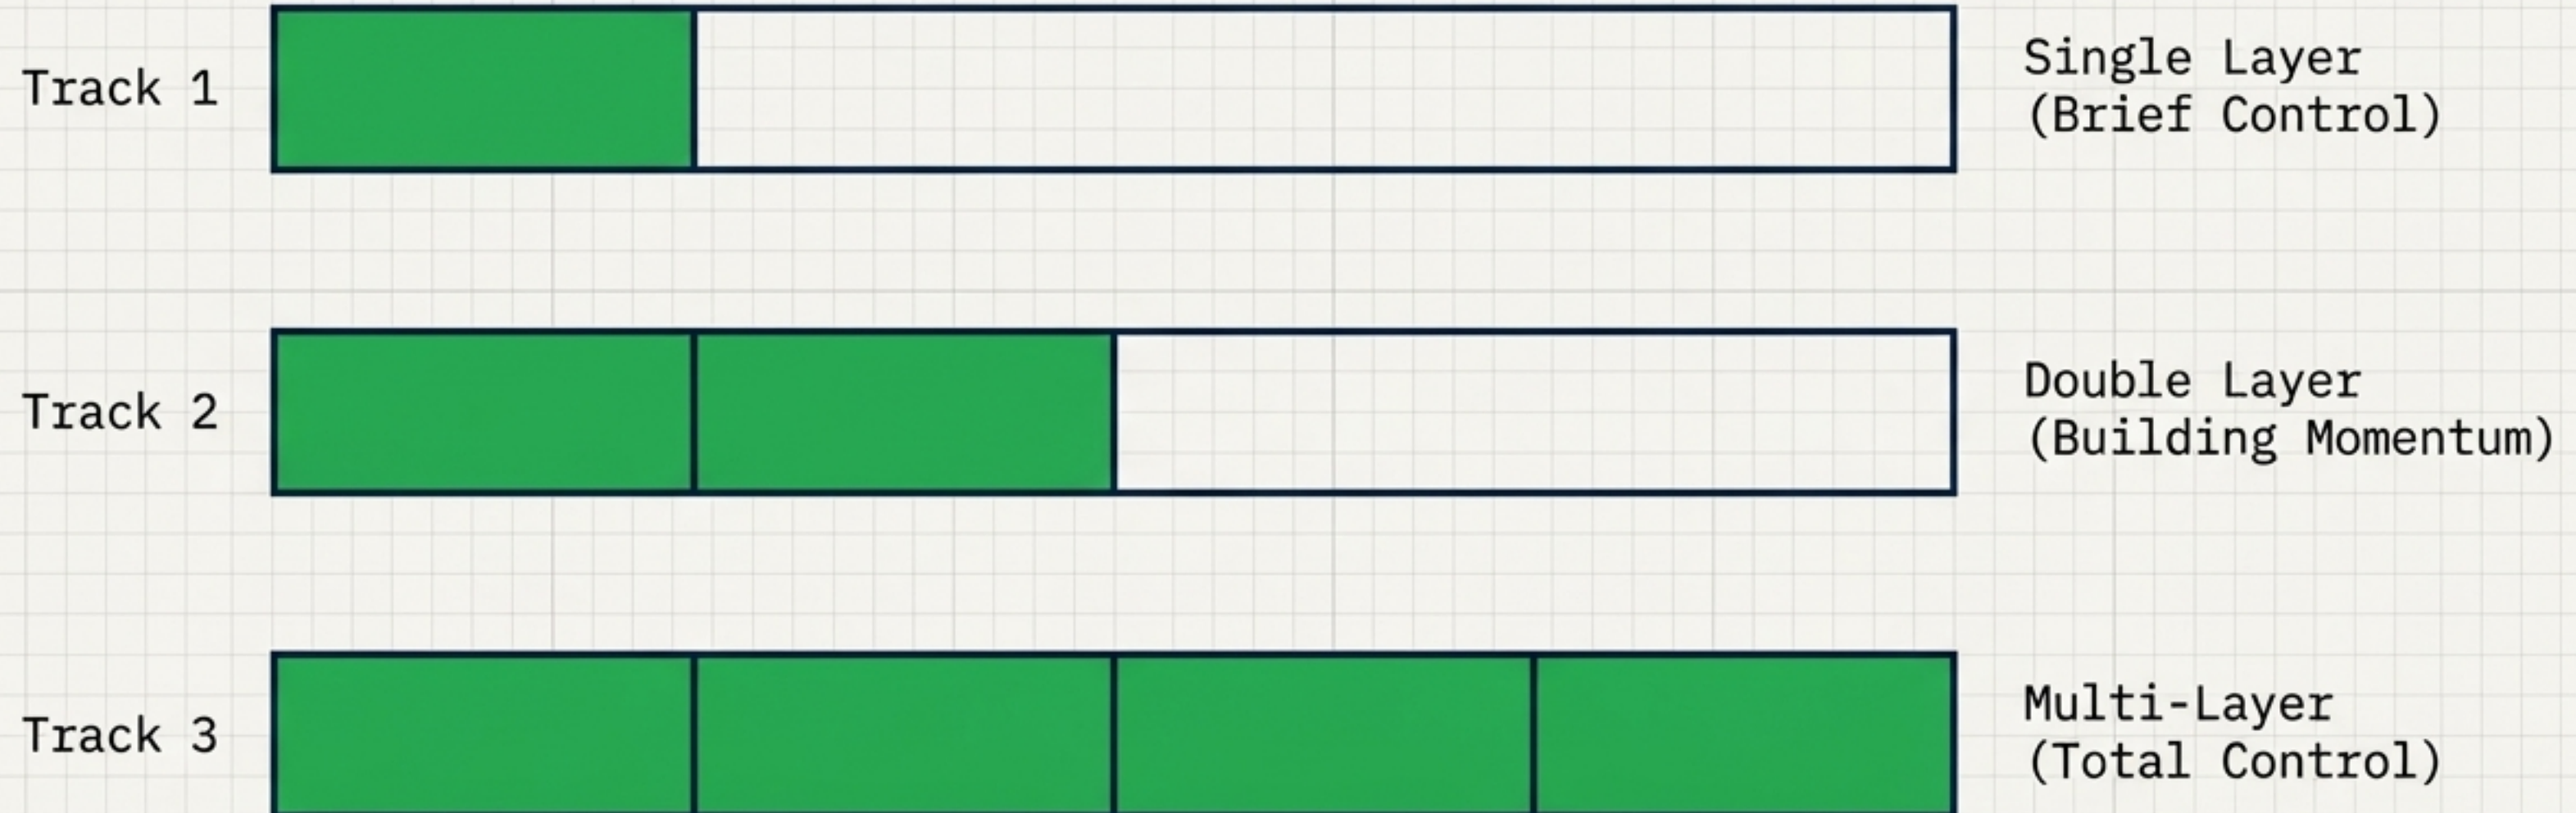

MICRO RULES SCALE PERFECTLY TO MACRO PATTERNS

An 'Inside Pattern' is judged exactly like an 'Inside Candle'. The math does not change with scale.

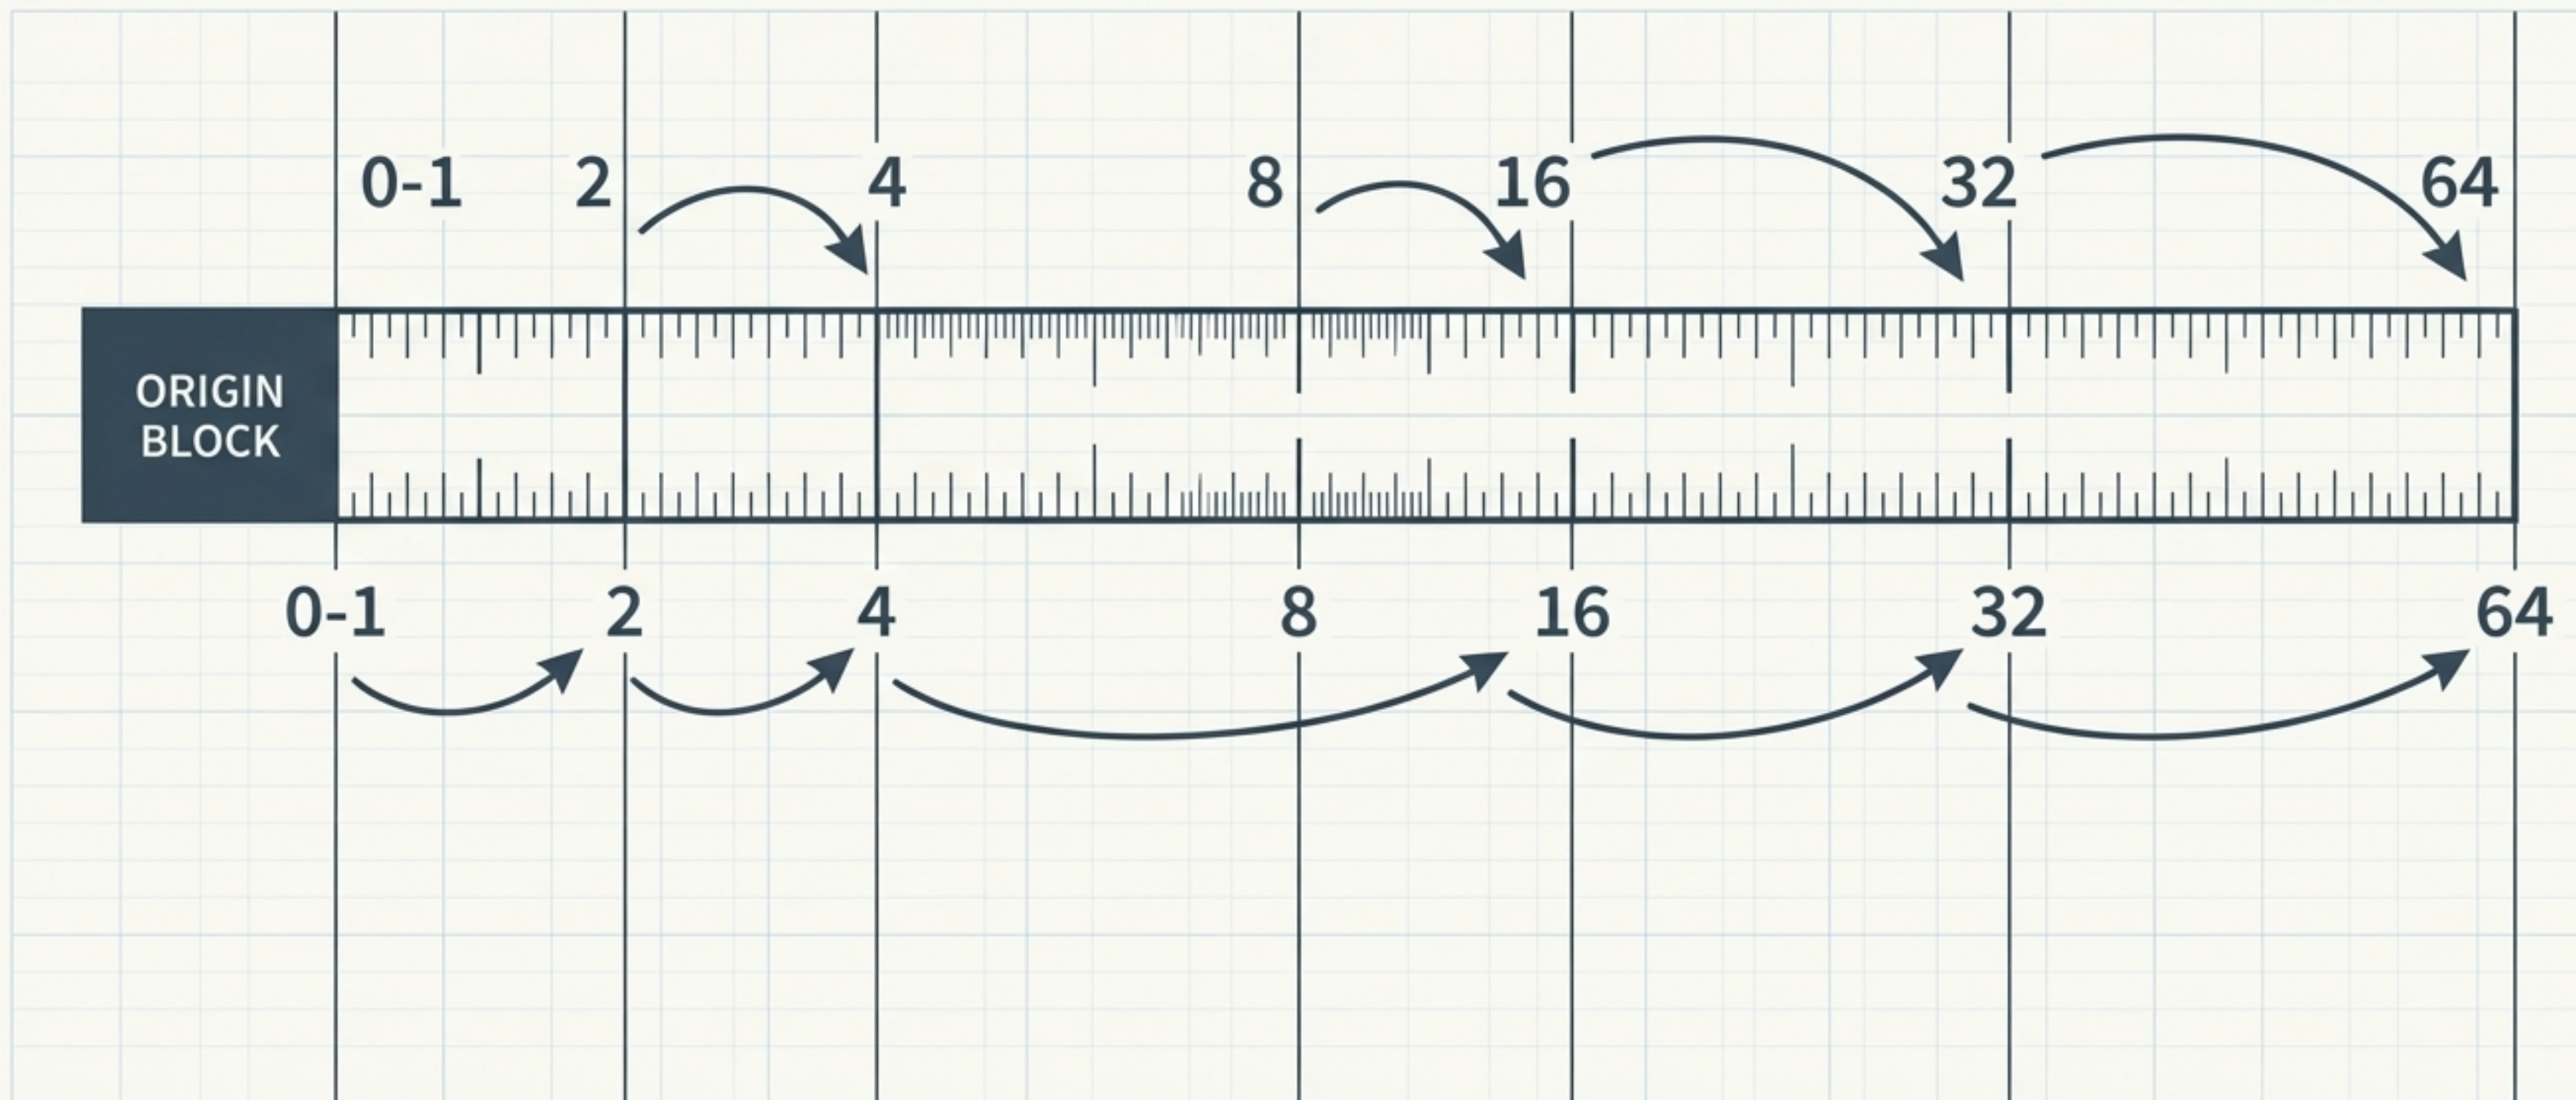

MEASURING MOMENTUM THROUGH LAYERING

Layering reveals how long a specific side can hold the market hostage before yielding.

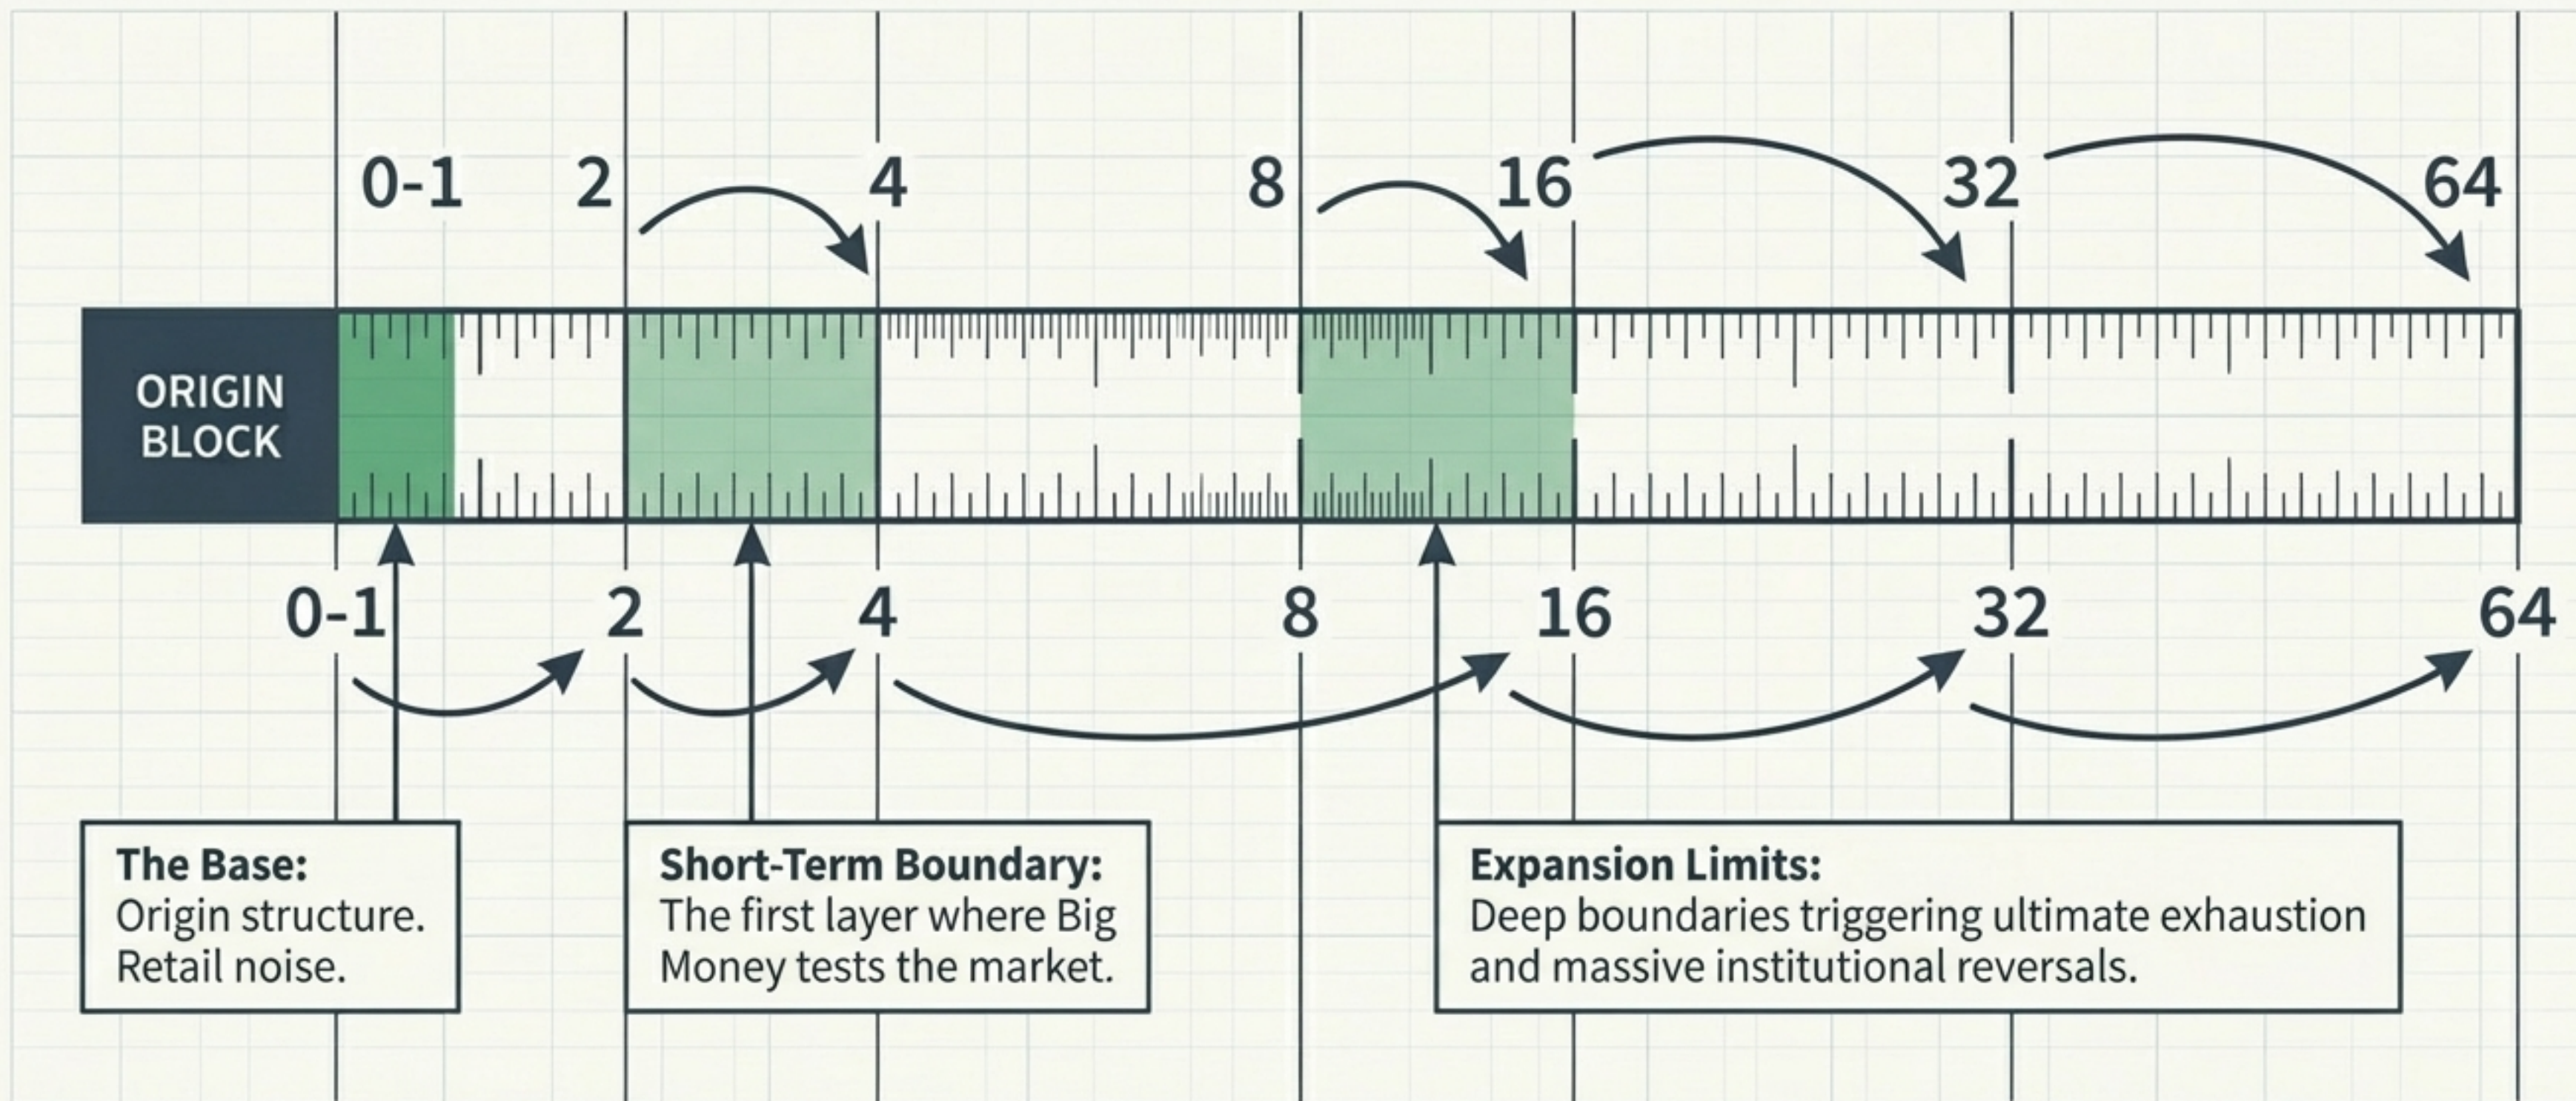

THE **EXPONENTIAL** MATH OF MARKET BOUNDARIES

Markets do not move randomly; they expand in mathematical multiples of their origin base.

LOCATING THE 'BIG MONEY' ZONES

Institutional players wait for exact mathematical boundary multiples to trigger large-scale actions.

The Strict Duality: Analyst vs. Trader

You must be both, but never at the same time. When the trade is live, shut off the Analyst.

THE ANALYST

- Looks at the 64x boundary
- Maps macro trends
- Answers “Where will it be in a year?”

THE TRADER

- Hyper-focused on the present layer
- Ignores future variables
- Acts instantly on the immediate boundary

The 3-Step Mastery Protocol

Eliminate outside noise. Do not go wide; go deep. Mastery requires deliberate repetition.
